

Myself as an Artist

How did an arts-integrated curriculum at GCCS help you make sense of the world around you? How have the arts at GCCS helped you better understand the content of your expeditions? Describe how the development of skills, craftsmanship, and character allowed you to create and/ or perform a piece in music, dance, or the visual arts in support of your learning expeditions during your time at GCCS.

Take a moment to remember and reflect: make a list of products or integrated art tasks that helped you better understand expedition content.

Art	Music	Physical Expedition

Choose one product/ task from each column and reflect on why these stood out to you:

Art	
Music	
Physical Expedition	

Now, choose one of the three arts & its product to develop in your written reflection. Be sure to think about:

Skills: What specific arts skills were required to complete this product or task? How did your skills as an artist improve over the course of the expedition?	Craftsmanship: How did use use accuracy and attention to detail to create a beautiful work of art? How did drafts or practice allow you to create this work?	Connections: How did the expedition content deepen your work in art? How did the art help you better express yourself and your content knowledge?

Finally, what character traits or Design Principles are evident in your work?
